

Multilingual Voice Assistant

Project roadmap, phase by phase

Indian fintech rules & schemes assistant

This project is a voice assistant that speaks Hindi, Kannada, Tamil, and English.
It was built step by step, in seven small phases.
Each phase adds one new skill, and is easy to test on its own.

How to read each phase page

WHY

Why this phase is needed

WHAT

What actually gets built

OUTCOME

What you get at the end

1

PHASE 1 OF 7

Speech round trip

Getting voice in and out working

WHY THIS PHASE

To check if voice in and voice out work at all.

WHAT WE DO

Record your voice, turn it into text, then speak a reply back.

OUTCOME

A working mic-to-speaker loop, in English.

2

PHASE 2 OF 7

Multilingual layer

Understanding Indian languages

WHY THIS PHASE

Users speak different Indian languages, not just English.

WHAT WE DO

Detect the spoken language, translate it, and reply in that same language.

OUTCOME

Assistant understands Hindi, Kannada, Tamil, and English.

3

PHASE 3 OF 7

RAG (fact grounding)

Making answers true, not guessed

WHY THIS PHASE

Answers must come from real facts, not guesses.

WHAT WE DO

Search real FAQ data first, then generate the answer from it.

OUTCOME

Assistant gives fact-checked, grounded answers.

4

PHASE 4 OF 7

Agent with tool

Letting the assistant take action

WHY THIS PHASE

The assistant should also take action, not just talk.

WHAT WE DO

Build a smart router that picks a plain answer or an eligibility check.

OUTCOME

Assistant can now check scheme eligibility too.

5

PHASE 5 OF 7

Full voice pipeline

Connecting every piece

WHY THIS PHASE

All the separate parts need to work together, smoothly.

WHAT WE DO

Connect speech, language, and the agent into one single flow.

OUTCOME

One complete voice assistant, start to finish.

6

PHASE 6 OF 7

Demo UI

Making it easy to show off

WHY THIS PHASE

You need an easy way to show this to other people.

WHAT WE DO

Build a simple web app with a microphone button.

OUTCOME

A shareable browser demo, ready for an interview.

7

PHASE 7 OF 7

Landing page

Sharing the project online

WHY THIS PHASE

You need to showcase the project outside of code.

WHAT WE DO

Build a small website page that describes the project.

OUTCOME

A link or screenshot ready to post on LinkedIn.
